Annual Activity Report

Humans In Mutual Symbiosis with Nature

2025

EXECUTIVE SUMMARY

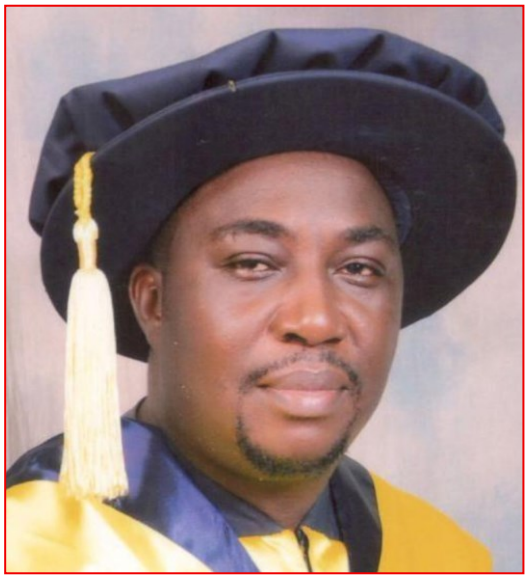

In 2025, Green Globe Organization (GGO) built on the strong foundation established in 2024, by further advancing its mission to combat climate change and promote sustainable development across Cameroon.

A major highlight of 2025 was GGO's participation in the New Generation Summit held in Dubai in January 2025, where the organization engaged with global stakeholders, innovators, and youth leaders committed to advancing sustainable solutions to pressing global challenges. This international platform provided an opportunity for knowledge exchange, partnership building, and the showcasing of community-driven climate initiatives from Cameroon.

In collaboration with SHARE INNOME, GGO also implemented the WE-LEAD Project from December 2025, which is an initiative designed to equip secondary school students with innovative skills to address environmental and broader societal challenges. Through hands-on training, mentorship, and practical problem-solving exercises, students are being empowered to design creative and sustainable solutions within their communities.

As GGO looks ahead, it remains committed to scaling its programs, nurturing the next generation of climate leaders, and building resilient communities capable of responding effectively to environmental and developmental challenges. With sustained collaboration from partners and stakeholders, We are well-positioned to accelerate transformative climate action in Cameroon and contribute meaningfully to global sustainability efforts.

FOREWORD FROM THE BOARD CHAIR

Professor Mbanga Lawrence Akei
Board chair, Green Globe Organisation

As we close the door on 2025 a year defined by growth and unyielding resilience I am filled with a sense of profound duty and gratitude. This year, Green Globe Organisation transitioned from a local beacon of hope in the Northwest to a **National Pillar of Sustainability**. We proved that the challenges of conflict-affected landscapes do not stifle innovation; they demand it. By representing Cameroon at the **New Generation Leaders' Summit in Dubai** and the **Hult Prize Global Stage in the United Kingdom**, we carried the voices of our communities into the boardrooms of global influence.

Our core philosophy, **"Mutual Symbiosis between Humans and Nature,"** moved from theory to transformative practice. We didn't just plant trees; we restored the life-giving watersheds of **Bambui, Baforkum, and Lake Bambili**, securing the water sovereignty of thousands. We witnessed our trainees now **Eco-Entrepreneurs** harvesting high-yield crops in the face of climate variability, proving that food security is the strongest shield against poverty.

To our tireless volunteers: you are the heartbeat of this revolution. Your sacrifices in the fields of the Northwest and your voices on the airwaves of UBa Radio have turned a mission into a movement. **THANK YOU.** You have proven that youth leadership is not a future promise, but a present reality.

As we look toward 2026, we do so with the mandate of an **Adaptation Champion**. With our landmark partnership with **SHARE INNO** IN FRANCE, **TSARONA** IN GERMANY, **SMILY ACADEMY** IN ITALY, **MOMENTUS** IN SPAIN, **COLLABORATIVE FOR CHANGE** IN THE UNITED STATES OF AMERICA, **MINISTRY OF TRANSPORT** IN CAMEROON and our role as the **YILT Africa Country Secretariat**, we are ready to scale our "Green Blueprint" across the nation and the continent.

OVERVIEW

ORGANIZATIONAL BACKGROUND

Green Globe (GGO) is an environmental youth-led community centered non-profit organization that advocates for the protection of the environment through our field tested concept of high efficiency known as Consultative Intricacies Preferences which is a pathway for sustainable development. Officially legalized in October 2021, We operate on the pivot of providing Local Solutions to Local Problems through a community participatory approach.

VISION

Green Globe is out to see sustainable development, through capacity building, seminars, workshops, sensitization programs, advocacy, humanitarian actions, relief initiatives and benevolence in every area of human live that has implications on the environment.

MISSION

Green Globe has as mission to foster environmental stewardship and community resilience with a determination for an environmental centered human development through collective efforts and action geared towards sustainable development. This is to advocate for the wellbeing of the population in ways that ensure environmental protection

OUR FOCUS

Advocating for the environmental protection.	Orchard and Tree Nursery development	Afforestation and conservation projects
Climate-Smart Agriculture	Active Volunteerism	Humanitarian actions, relief initiatives, benevolence.
Climate Justice	Community mobilization, sensitization, training and counselling on environmental issues.	Environmental Education

Women and Girls in Climate action	Vocational trainings/workshops	Environmental impacts assessment on different projects.
Landscape Management	Fostering sustainable community development	Water catchment management

NEW GENERATION LEADERS SUMMIT IN DUBAI

In early 2025, Green Globe Organisation's grassroots impact was elevated to a global platform. After winning the prestigious **SDG Innovate Cameroon Award**, our founder, **Awat Bertrand Abanyi**, was selected for a fully funded mission to the **New Generation Leaders Summit in Dubai**. This recognition was not just a celebration of past work, but a strategic investment in our vision for community-led climate justice.

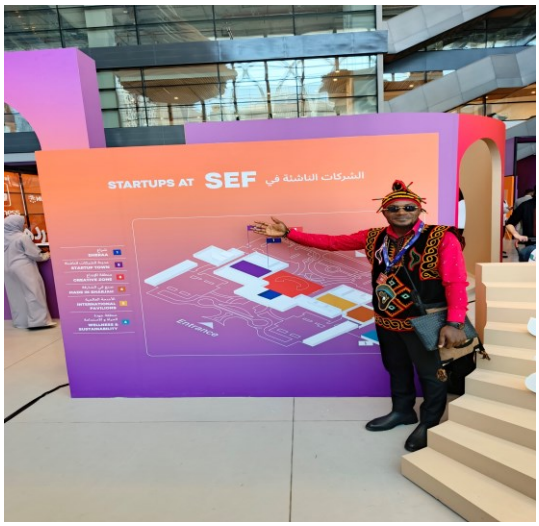

While in Dubai, Awat presented Green Globe's core methodology: **"Local Solutions to Local Problems."** He demonstrated how a community-participatory approach can dismantle the "Imperial

Legacies" of environmental neglect. By centering local knowledge, our project proves that empowering youth with sustainable livelihood skills is the most effective way to ensure long-term environmental conservation.

This Came as a fully funded trip as we won the SDG Innovate Cameroon Award for our impactful work on sustainable development. This recognition celebrates our dedication to addressing climate change, empowering communities, and promoting innovative solutions. Together, we will continue driving change for a sustainable future.

SHARJAH ENTREPRENEURSHIP FESTIVAL (SEF)

In February 2025, Green Globe Organisation was invited to the **Sharjah Entrepreneurship Festival (SEF)**, one of the region's largest platforms for innovation. Centered at the Sharjah Research, Technology and Innovation Park, this event provided a high-profile stage to showcase how youth-led entrepreneurship is the primary engine for achieving the **Sustainable Development Goals (SDGs)**.

Our Philosophy: Mutual Symbiosis Between Humans and Nature At the heart of our presentation was the Green Globe motto: **"Humans in mutual symbiosis with nature."** We challenged the traditional narrative that economic development must come at the cost of the environment. Instead, we introduced **Eco-Entrepreneurship** a model where business success and ecological restoration are interconnected. By empowering youth to bring fresh, adaptable perspectives to environmental challenges, we ensure that innovation serves both the economy and the planet.

AI EVERYTHING IN ABUDHABI

It was an incredible opportunity for us to engage with experts, exchange ideas and explore innovative solutions at the inspiring conference on AI Everything in ABUDHABI The potential of artificial intelligence to drive positive change in environmental sustainability, youth empowerment, entrepreneurship, and sustainable development is immense.

While many view technology and nature as opposing forces, our Founder **Awat Bertrand Abanyi** used this platform to elucidate a different reality: that technology and sustainability must exist in a **"mutual symbiotic manner."** The delegation explored practical applications of AI, specifically focusing on tools that can **track deforestation rates**, **predict local climate patterns**, and optimize resource management for rural communities. Let's harness AI responsibly to create a greener, more just, and economically thriving world.

WATER SANITATION AND HYGIENE (WASH)

In the Northwest Region, water is becoming a point of survival and potential conflict. Climate variability and unsustainable land use have led to the degradation of primary watersheds. Without intervention, thousands of households in Bambui, Baforkum, and the surrounding Lake Bambili area faced the threat of seasonal water scarcity and declining water quality.

In 2025, Green Globe Organisation launched a multi-site restoration initiative. Moving beyond traditional "well-digging," we focused on the **source**: the catchments and watersheds that feed the community.

CELEBRATE WOMEN, CELEBRATE THE EARTH.

On International Women's Day 2025, Green Globe Organisation launched a strategic campaign to recognize and amplify the role of women in environmental sustainability. In the Northwest Region, women are the primary managers of water, food, and natural resources. We believe that true climate resilience is impossible without centering the voices of those who interact most intimately with the land.

Our 2025 gender initiatives moved beyond symbolic honor toward active leadership development. We focused on the intersection of **Ecological Stewardship** and **Community Decision-Making**: We highlighted the role of women farmers as the primary preservers of indigenous seeds and sustainable agricultural practices. Their traditional knowledge is a cornerstone of our strategies. we focused on mentoring young female students in STEM and Environmental Science, ensuring the next generation of "Eco-Leaders" is gender-balanced and visionary. Let's unite in our efforts to empower women and protect our planet. Together, we can build a greener, more equitable world for all. Stand with us. Celebrate women

Let's unite in our efforts to empower women and protect our planet. Together, we can build a greener, more equitable world for all. Stand with us. Celebrate women.

WORLD FOREST DAY 2025

On March 21, 2025, Green Globe Organisation marked World Forest Day not through mere ceremony, but through high-impact, strategic restoration. Forests are the biological "lungs" of our planet and the primary filters for our water catchments. However, in the Northwest Region, forests are disappearing

due to unsustainable agricultural practices and fuel-wood demand. Our mission is to reverse this trend by making forest conservation an economic opportunity

Recognizing that forests can only be protected if the surrounding communities thrive, Green Globe was instrumental in the intensive training of **300 Eco-Entrepreneurs**. These individuals were equipped with the tools to lead forest conservation from the front lines, turning environmental stewardship into a sustainable livelihood.

CLIMATE SMART AGRICULTURE

In 2025, with the strategic sponsorship of the **Luena Foundation**, Green Globe Organisation launched a transformative training program designed to bridge the gap between environmental conservation and economic survival. Guided by the philosophy, *"Don't give me fish; teach me how to fish,"* we empowered a cohort of young leaders to become architects of their own food and water security.

This was not merely a farming workshop; it was a masterclass in **Climate-Smart Agriculture (CSA)**. Our training modules were specifically designed to address the unique challenges of the Northwest Region,

We sincerely appreciate our partner Den Planet who were very instrumental in the planning, and execution coming all the way from Yaoundé is testament to their commitment to fostering youth empowerment and environmental conservation. Big shout-out to Maroline Itambi Asaah By investing in climate-smart solutions, we are fostering sustainable food systems and empowering youth to be changemakers in their communities.

CAMEROON CLIMATE JUSTICE MOVEMENT (CCJM),

In April 2025, Green Globe Organisation solidified its role as a pivotal leader in national environmental policy. Serving as a **Focal Point for the Cameroon Climate Justice Movement (CCJM)**, we co-led the strategic development of a landmark Action Plan dedicated to the protection of the Congo Basin—the world's second-largest carbon sink and a critical lifeline for African biodiversity.

Working alongside civil society actors, traditional rulers, and indigenous community representatives, Green Globe was instrumental in drafting a 360-degree advocacy framework. Our founder, **Awat Bertrand Abanyi**, contributed technical proposals that were unanimously adopted as the blueprint for the movement's 2025-2026 agenda.

The Action Plan focuses on four strategic imperatives:

1. **Elevated Advocacy:** Amplifying the voice of grassroots Civil Society Organizations (CSOs) within high-level environmental policymaking.
2. **Community Resilience:** Designing localized adaptation strategies to protect rural livelihoods from escalating climate shocks.

3. **Climate Finance Mobilization:** Creating transparent mechanisms to channel international climate funding directly into community-led ecological initiatives.
4. **Indigenous Rights & Land Tenure:** Establishing legal and social protections for the land and cultural rights of populations on the front lines of deforestation.

Establishment of a Climate-Resilient Tree Nurseries in Yaoundé and Bamenda

In 2025, Green Globe Organisation implemented a strategic environmental restoration and biodiversity conservation initiative through the establishment of a climate-resilient tree nursery in Yaoundé. The project was designed to strengthen ecosystem restoration efforts, promote agroforestry, and contribute to the conservation of threatened indigenous species.

The project was led and coordinated by Kaspa Bobga, who oversaw site selection, seed sourcing, nursery establishment, species propagation, and overall project supervision.

Key Achievements

1. Conservation of Endangered Species

The nursery successfully propagated **over 3,000 seedlings of Prunus africana**, an endangered medicinal tree species heavily threatened by unsustainable harvesting and habitat degradation.

This effort contributes directly to:

- In-situ and ex-situ conservation strategies
- Long-term restoration of degraded forest landscapes
- Protection of high-value indigenous biodiversity

2. Promotion of Agroforestry and Livelihood Species In addition to *Prunus africana*, the nursery includes a diverse range of fruit and forest species aimed at enhancing food security, climate resilience, and income generation. These include: Mango, Pear, Orange, Njansang (*Ricinodendron heudelotii*), Bush mango (*Irvingia gabonensis*)

These seedlings are intended for distribution to local communities and schools, promoting:

- Community-based tree planting initiatives
- Environmental education and youth engagement

- Sustainable agroforestry and reforestation efforts

3. Climate Change Mitigation and Ecosystem Restoration

The nursery contributes to:

- Increased carbon sequestration potential
- Landscape restoration
- Improved biodiversity conservation
- Sustainable land-use practices

Strategic Impact

This 2025 Green Globe project aligns with national and global environmental priorities, particularly biodiversity conservation and climate action. The initiative also serves as a demonstration and training platform for youth engagement in environmental sustainability and ecosystem restoration.

Through strong leadership and technical coordination, we ensured the successful establishment, propagation, and planned community distribution of seedlings, positioning the nursery as a scalable model for future reforestation and conservation initiatives under Green Globe Organisation.

Global Week of Action Mobilization

Green Globe Organization in partnership with DEN Planet joined the Global Week of Action 2025 which has as theme “Empowering Local Action for a Sustainable Future.” The mobilization titled “Training of Children as Climate Rescuers in Yaoundé” at Nkandap Secondary and Primary School aimed to:

- Educate children on climate change and environmental protection.
- Encourage recycling and creativity through art and crafts.
- Promote advocacy and ownership of a clean environment.
- Improve the school environment through tree planting and a cleanup campaign.

2. Activities Carried Out

ACTIVITY	DESCRIPTION	RESULTS / HIGHLIGHTS
ART & CRAFTS (RECYCLING)/ ECOSYSTEM BUILDING	The students used waste like covers of plastic bottles, and any natural material they could find in their environment to create artwork and ecosystem models.	An artwork produced showing the ecosystem; increased awareness on the importance of waste recycling and the importance of conserving our ecosystem.
TREE PLANTING	5 normal trees and 2 grafted trees making a total of 7 fruit trees were planted around the school compound.	Students understood the impact of planting a tree not only in their school premises but also in their community.
ADVOCACY SESSION	Students presented strong action word on climate action.	They understood the role they play in climate action; increased their willingness to know and do more; Boosted confidence.
SCHOOL CLEAN-UP	Classrooms, yard, and surroundings cleaned. Waste was thrown in dustbin around their school environment.	This activity helped to beautify school and improve the hygiene condition of students in the school premises.

3. Achievements

- 50 students directly benefited from this project.
- 7 trees planted which helps in greening the school.
- Students gained practical waste recycling and advocacy skills.
- Environmental Club launched for sustainability.

DEN PLANET
Training of Children As Climate Rescuers in Yaounde
GREEN GLOBE

The activity was a success, with students showing enthusiasm, creativity, and commitment to environmental protection. The event not only transformed the school environment but also inspired children to become agents of change in their communities.

WEEKLY RADIO PROGRAM

Throughout the entire year of 2025, from January to December, Green Globe Organisation maintained a consistent and powerful presence on the airwaves. By hosting a weekly environmental flagship program on the **University of Bamenda Radio Station**, we have successfully bridged the gap between scientific climate data and grassroots community action

This program serves as a vital platform for environmental education, reaching thousands of university students and local community members across the Northwest Region. By utilizing the power of

community radio, we have democratized access to critical information *"Our radio program isn't just about talking; it's about listening. It provides a space where the university's academic research meets the community's lived experience. We are not just broadcasting information; we are building a movement, one listener at a time."* **Green Globe Communications Team**

SCALING SOCIAL INNOVATION

On Africa Day 2025, Green Globe Organisation reached a new frontier in youth development by launching the first-ever **"We-LEAD Now!"** journey in Africa. In a strategic partnership with **Share Inno (France)**, Green Globe was selected as the **Main Implementation Partner** for this award-winning youth social innovation experience.

The Vision: Co-Creating Local Solutions with Global Standards The "We-LEAD Now!" initiative is designed to empower young Cameroonian changemakers to move beyond traditional activism. By merging **Local Wisdom**, **Modern Science**, and **Artistic Creativity**, the program provides a transdisciplinary framework for youth to design real-world solutions.

"We are not just importing a model from France; we are co-creating a new language for African innovation. 'We-LEAD Now!' is proof that when we combine grassroots grit with global networks, our youth become unstoppable." **Green Globe & Share Inno Joint Statement**

The Architecture of Peace Securing the Future of Cameroon

“Sustainability is impossible in the shadow of conflict. To build a 'Green Globe,' we must first silence the engines of violence.”

In 2025, Green Globe advanced its mission of community resilience by addressing one of the most significant barriers to development in Cameroon: the proliferation of illicit Small Arms and Light Weapons (SALW). Through a strategic partnership with Xhuma Africa and the International Action Network on Small Arms (IANSA), we co-organized a high-impact legislative summit in Bamenda, designed to turn policy into protection.

Our Technical Leadership: The Human Cost of Arms

While the global discourse often focuses on statistics, Green Globe led the technical facilitation of the module: The Socio-Economic and Public Health Impacts of SALW on Cameroonian Communities. We provided the youth parliamentarians and senators with a forensic look at how illicit arms act as a

"multiplier of poverty." Our module bridged the gap between international treaties and the lived reality of families affected by the Anglophone Crisis, Boko Haram, and highway banditry. We didn't just talk about guns; we talked about the schools closed, the farms abandoned, and the healthcare systems strained by preventable violence.

Empowering the Next Generation of Lawmakers

The workshop served as a masterclass in the UN Programme of Action (PoA) and the International Tracing Instrument (ITI). By equipping youth leaders with these frameworks, Green Globe has ensured that the next generation of Cameroonian legislators has the technical expertise to:

Enforce robust marking and record-keeping of weapons.

Advocate for transparency in national arms management.

Champion community-based peacebuilding over militarization.

A Tangible Legacy: From Dialogue to Decree

This was not a workshop of "empty words." The collaboration resulted in two landmark outputs:

The Legislative Petition: A formal, multi-signatory petition submitted to the Government of Cameroon, demanding the immediate strengthening of national SALW policies.

The Advocacy Documentary: A 15-minute cinematic call-to-action featuring Green Globe's insights, designed to mobilize public opinion and hold stakeholders accountable under the banner of #GunFreeCameroon.

The Language of Peace: Revolutionizing Conflict Transformation through NVC

"If sustainability is our goal, empathy must be our method. In 2025, Green Globe invested in the power of words to heal what violence has broken."

In an era where social cohesion is the bedrock of development, Green Globe remains committed to mastering the art of dialogue. This year, our team participated in the prestigious International Justice and Peace Conference (IJPC) Peace Hub Workshop, a high-intensity residency supported by Baba Tree International and organized by Draufsicht Bamenda.

The focus? Nonviolent Communication (NVC) a transformative psychological and linguistic framework designed to bridge the deepest divides.

Strategic Capacity Building: Internalizing the NVC Framework

Representing Green Globe, Hope Apuya (Administrative Assistant) joined a cohort of civil society leaders and educators to undergo training led by the internationally acclaimed, certified NVC trainer Samuel Odhiambo from Kenya.

Our participation focused on the four pillars of the NVC model, which have now been integrated into Green Globe's internal operations and community outreach strategies:

Observations: Distinguishing raw facts from biased evaluations to reduce defensiveness.

Feelings: Cultivating the emotional intelligence to identify the impact of conflict.

Needs: Uncovering the universal human values that drive all actions.

Requests: Formulating clear, actionable paths toward mutual resolution.

The "Empathy Gateway": From Theory to Grassroots Action

Through immersive needs-card activities and real-life role-plays, our team gained the skills to navigate the "human element" of peacebuilding. As noted during the workshop, “Empathy is the gateway to peace.” For Green Globe, this means our field officers and administrative staff are now better equipped to handle high-tension community negotiations and foster "togetherness" in fragmented regions.

Impact Statement: Why This Matters for 2025

By institutionalizing NVC, Green Globe is moving beyond traditional "top-down" aid. We are fostering a culture of radical honesty and care. This training directly strengthens our work at the intersection of environmental justice and social peace, ensuring that our projects are built on a foundation of trust, social cohesion, and harmony.

Perspective from the Field:

"The IJPC workshop wasn't just about learning to speak differently; it was about learning to see the humanity in 'the other.' At Green Globe, we are now applying these principles to ensure our community interventions are as compassionate as they are impactful."

HULT PRIZE

In May 2025, Green Globe Organisation cemented its status as the leading force in Cameroonian youth entrepreneurship. After a grueling, multi-stage competition, our team emerged as the **Overall Winners of the Hult Prize**. This prestigious victory was not just a win for our organization, but a win for the entire environmental movement in Cameroon. Our path to the top was a testament to the rigor and scalability of our sustainable development models:

- **The University Phase:** We competed against **18 elite teams** from the University of Bamenda, securing the top spot with our innovative approach to "Mutual Symbiosis."
- **The National Finals:** Representing our region, we went head-to-head with **18 champion teams** from universities across the entire country. Our model for youth-led environmental restoration was judged the best in Cameroon.
- **Global Selection:** By winning the National Title, Green Globe earned the distinct honor of representing **The Republic of Cameroon** on the international stage in the **United Kingdom**.

"Winning the Hult Prize at the national level wasn't just about a competition; it was about proving that the solutions to the world's most pressing problems are being designed right here in Bamenda. We are ready to take Cameroon's vision for a sustainable future to the global stage." **Green Globe Hult Prize Delegation**

STRATEGIC ENGAGEMENT WITH THE NORTH WEST REGIONAL ASSEMBLY (NWRA)

The Collaboration: Aligning with Regional Development Goals in May 2025, Green Globe Organisation was honored with an invitation to meet the **Highly Esteemed Executives of the North West Regional Assembly**. This high-level engagement marked a milestone in our efforts to align our environmental and youth-led initiatives with the strategic development vision of our home region.

.

The Vision: Empowering the Next Generation of Northwest Leaders Our dialogue focused on the Assembly's commitment to youth empowerment and its efforts to create pathways for young Cameroonians to achieve their full potential. At Green Globe, we recognize that the North West Regional Assembly has been a cornerstone in our growth, providing a platform that allows local organizations to scale their impact.

"We are profoundly proud of our Northwest identity. Our engagement with the Regional Assembly is a testament to what is possible when grassroots innovation meets visionary governance. Together, we are building a region where every youth has the potential to lead and every community has the resources to thrive." **Awat Bertrand Abanyi, following the Executive Session**

EXCELLENCE IN SDG ADVANCEMENT THE 2025 CERTIFICATE OF RECOGNITION

The Milestone: A Confluence of Tradition and Innovation On August 23, 2025, Green Globe Organisation's dedication to the United Nations Sustainable Development Goals was formally honored by **SDG Innovate Cameroon**. In a moment of profound cultural and strategic significance, our founder received the **Certificate of Recognition** from the hands of **His Royal Highness, the highly esteemed Fon (King) of Mejang Village**.

This ceremony highlighted a critical truth: that for sustainability to be "just," it must be blessed by the traditional custodians of the land and driven by the innovative spirit of the youth.

The award recognizes Green Globe's "outstanding resilience" in advancing the 2030 Agenda within complex, conflict-affected landscapes. Our approach uses environmental action as a **tool for peacebuilding**, proving that when communities work together to restore a water catchment or a forest, they are also restoring the social fabric of their society

"This recognition is not a destination; it is fuel. Receiving this honor from our traditional royalty reminds us that our work is rooted in the soil and the souls of our people. We are more inspired than ever to scale this mission."

EMPOWERING COMMUNITIES, INSPIRING CHANGE

"Young Changemaker" Fellowship In late 2025, the **Luena Foundation Unicorn Crew** officially recognized the leadership of Green Globe Organisation by awarding our founder, **Awat Bertrand Abanyi**, the **Young Changemaker Fellowship Certificate**. This fellowship is reserved for high-potential leaders who demonstrate the ability to scale grassroots solutions into systemic regional change.

At Green Globe Organisation, we see this recognition as a testament to the dedication of our team, our volunteers, and the communities who inspire us every day. It reinforces our vision of a future where youth-led innovation transforms local challenges into pathways for sustainable development.

We extend our gratitude to the Luena Foundation Unicorn Crew for celebrating grassroots leadership and reaffirming the importance of investing in young leaders driving climate and food security solutions.

Together, we continue to nurture resilience, hope, and sustainable growth.

15) We are please to have carried out a strategic action on the ground which our partner SHARE INNO along side the United States Foundation, and partners The Jena Declaration, Climate Coordination, and ChangeNOW, we hosted a very special evening, and the response went far beyond our expectations.

The night opened with a concert by Bartu Elci-Ozsoy and the SHARE Ensemble, whose moving performance set the tone for an unforgettable evening. The concert was dedicated to mobilizing support for We-LEAD Now!, our youth social innovation program, and we are deeply grateful to everyone who contributed to this cause.

The program continued with the screening of the award-winning documentary Plastic People: The Hidden Crisis of Microplastics. Both the music and the film were received with enormous admiration. Our post-event survey shows that participants left inspired: many said the film helped them grasp the impact of microplastics on human health and the environment, and motivated them to reduce their own plastic use while encouraging family and friends to do the same

A particularly touching moment came from a video message sent by our We-LEAD Now! team in Cameroon, led by GREEN GLOBE ORGANISATION, which is tackling sustainability challenges in their communities, including plastic pollution. Their voices brought an intergenerational perspective that touch everyone.

CALL FOR VOLUNTEER

We launched our call for volunteerism.

To sustain the massive momentum of our 2025 projects from water catchment restoration to international advocacy Green Globe Organisation officially launched its **2025 Call for Volunteerism**. This initiative was designed to transform passive supporters into active changemakers, building a robust network of dedicated individuals committed to environmental sovereignty and youth empowerment.

Are you ready to ignite change in your community? We invite you to be a part of something bigger than yourself! Volunteerism is not just about giving your time; it's about creating lasting connections, inspiring hope, and transforming lives.

Imagine the impact we can make together! Whether you have a few hours or a few days to spare, your unique skills and passion can help us uplift those in need and bring smiles to faces. From mentoring youth to supporting local initiatives, every effort counts.

The big question is: Why Volunteer?

We volunteer to:

• Empower Others

• Build Community

• Grow Personally, etc.

Ready to take the leap? Join us in this rewarding journey of service and solidarity. Together, we can create ripples of change that resonate far and wide.

🔗 Sign up today and be the spark that lights the way!

LEADERSHIP

Green Globe Organisation's leadership was called upon to provide the strategic vision for the **Global Teen Changemakers** program. Our founder, **Awat Bertrand Abanyi**, served as the Keynote Speaker for the "Redefining Your Path to Sustainable Success" summit a prestigious space bringing together students, young leaders, and professionals from across the globe.

By

leading this international dialogue, Green Globe has expanded its influence from the field to the classroom and the boardroom. This engagement reinforced our commitment to **SDG 4 (Quality Education)** and **SDG 17 (Partnerships for the Goals)**, proving that our "Mutual Symbiosis" philosophy is a replicable model for global youth.

INDIGENOUS KNOWLEDGE WITH ECO-BUSINESS INNOVATION

In November 2025, Green Globe Organisation took to the international stage at the **Voices of Smilers Conference**. Our Founder and Team Lead, **Awat Bertrand Abanyi**, was invited to share our unique "Mutual Symbiosis" model a framework that blends indigenous knowledge with eco-business innovation to drive landscape restoration.

Awat's session provided deep insights into the practicalities of climate action within **conflict-affected areas**. While many environmental organizations struggle in fragile zones, Green Globe has thrived by centering community needs and local wisdom.

"We are not just surviving; we are regenerating. By combining the ancient wisdom of our ancestors with the innovative energy of our youth, we have created a model for climate resilience that can withstand even the most complex social challenges

ADATATION CHAMPION

A Voice for the Region In a strategic gathering of the nation's most impactful climate leaders in Yaoundé, Green Globe Organisation's Founder and Team Lead, **Awat Bertrand Abanyi**, was officially recognized as the **Adaptation Champion for the Northwest Region**.

This title is not merely an honor; it is a mandate to lead, coordinate, and scale community-led resilience across one of Cameroon's most ecologically and socially complex landscapes.

The recognition followed an intensive, enriching climate adaptation workshop where young leaders from across the country synchronized their strategies for the **National Adaptation Plan**. Our participation ensured that the specific challenges of the Northwest such as high-altitude watershed degradation and the intersection of climate and conflict remained at the forefront of the national agenda.

In November 2025, Green Globe Organisation successfully reached a new milestone in the implementation of **We-LEAD Now!**. This is not a traditional classroom program; it is a transformative, **Competence-Based** journey designed to turn students into active social architects.

Born from the **SHARE-INNO** ecosystem, this program is rooted in the philosophy that young people should lead *now*, not in some distant future.

By providing a platform for action, Green Globe is creating a "Space of Excellence" in the Northwest Region. The We-LEAD Now! program ensures that our youth are not just observers of the climate crisis, but are the primary designers of the solutions.

YOUH EMPOWERMENT

In November 2025, Green Globe Organisation reached a milestone in our mission to ensure food security through the implementation of **Climate-Smart Agriculture (CSA)**. Following our intensive training program, our trainees were tasked with applying best agricultural practices on their own plots. This transition from theory to practice was supported by a comprehensive "Input Package" provided by Green Globe and the **Luena Foundation**.

The results have been nothing short of delightful. Despite the challenges typically associated with the **second agricultural cycle**, our trainees have successfully harvested high-yield crops. This success proves that with the right combination of **indigenous wisdom** and **modern CSA techniques**, young farmers can overcome seasonal variability and ensure year-round food access.

CLIMINNOV- The Green Landmark Seminar

Setting the Green Landmark In a historic moment for environmental education in the Northwest, Green Globe Organisation was instrumental in the organization of **ClimInnov – The Green Landmark Seminar**. As the first-ever sustainability seminar centered on environmental leadership at the University of Bamenda, this event transformed the campus into a hub for climate innovation and strategic problem-solving.

The seminar was designed to move beyond traditional environmentalism toward **Transformational Leadership**. Our founder, **Awat Bertrand Abanyi**, delivered an "electrifying" keynote presentation that challenged students and faculty to move from climate anxiety to climate agency.

YOUTHS IN LEADERSHIP TRANSFORMATION AFRICA

In December 2025, Green Globe Organisation's influence expanded across national borders with our appointment as the official **Chapter Representative for Youth in Leadership Transformation (YILT) Africa**. In a move that solidifies our organization's reputation for excellence, our founder, **Awat Bertrand Abanyi**, was appointed as the **YILT Country Coordinator for Cameroon**.

This partnership provides Green Globe with a powerful continental platform to foster transformational leadership. YILT Africa is dedicated to moving beyond traditional management toward a model of leadership that is ethical, innovative, and deeply rooted in the African context.

STRATEGIC PARTNERSHIP WITH MINT

In the final quarter of 2025, Green Globe Organisation expanded its advocacy horizon by entering high-level negotiations with the **Ministry of Transport**. We are currently co-designing a landmark national program to establish **Road Safety Clubs** in schools across the ten regions of Cameroon. This initiative recognizes that sustainable development must include the protection of human life through informed civic action.

MINISTERE DES TRANSPORTS
MINISTRY OF TRANSPORT

With the foundational planning and institutional buy-in secured in 2025, Green Globe is confident in launching the pilot phase of this program in 2026. This project represents a significant shift from localized action to **National Systemic Change**.

NORTHWEST REGIONAL ASSEMBLY

In a landmark moment for our organization, the **Northwest Regional Assembly** presented Green Globe Organisation with the **Excellent Award** for our strategic contributions to the development of the region. This award represents the highest level of institutional recognition within the Northwest and serves as a formal endorsement of our "Mutual Symbiosis" model.

"This Excellent Award belongs to the communities of the Northwest who have stood by us in the forests and at the water catchments. We thank the Northwest Regional Assembly for recognizing that the path to development is paved with environmental responsibility and youth-led innovation."

This year we signed 7 partnership and MoU with

-SHARE INNO IN FRANCE

-TSARONA IN GERMANY

-SMILY ACADEMY IN ITALY

-MOMENTUS IN SPAIN

-**COLLABORATIVE FOR CHANGE** IN THE UNITED STATES OF AMERICA
